1726.

Wherein we have a Tide-Table, the time of the Eclipses for this Year, with divers Observations in Physick, Husbandry, Gardening, &c. also how to make Bonds, Bills, Acquittances, Wills, and Indentures of all sorts.

WITH
A Description of the High-ways and Fairs throughout ENGLAND.

Calculated for the Meridian of *Kings-Lyn*, where the North Pole is elevated 52 degrees 43 minutes above the Horizon, and may indifferently serve any other place within the Realm of *England*.

L O N D O N,
Printed by *R. Bruges*, for the Company of Stationers. 1726.

Fly, 1726.

By the help of two following Tables you may readily find the time of Full-sea or High-water at any of the Havens under-named, without any notable Error, except the Moon's Latitude, Land-flood, contrary Winds, &c. somewhat alter the time.

The Names of certain Havens, the Point of the Compass whereunto the Moon coming, maketh High-water.

Of the Eclipses this Year.

THere will be Four Eclipses this Year, two of ea
Luminary, in the following order.

The first is of the *Sun*, on the 22d Day of *March*,
between 2 and 3 in the Afternoon, which by reason of t
Moon having South Latitude, will not be seen in a
part of *England*; but to such as inhabit the Southe
Parts 'twill be seen.

The second is of the *Moon*, on the 5th day of *Apr*
at 1 in the Afternoon, therefore invisible.

The third is of the *Sun*, on the 14th day of *Septemb*
beginning a quarter before 5, and ending half an ho
after 6 in the Afternoon, at which time, if the Air
clear, we shall behold half the *Sun's* Body to be darkne
and will set before the Eclipse is over.

The fourth and last is of the *Moon*, on the last d
of *September*, beginning a little before 4 in the morn
ing, and ending a little before Sun-rising, in wh
time almost half the *Moon's* Body will be darkned, whi
(if the Air be clear) will be visible to us.

The Beginning of the Four Quarters of this Year.

TH E *Spring* Quarter begins *March* 9 day, 32 m. pa
9 after Noon, when Day and Night are equal.

The *Summer* Quarter begins *June* 10 day, 55 m. pa
8 in the Afternoon, making the longest Day to all wh
inhabit on this side the Equator.

Autumn, or *Harvest* Quarter begins *September* 12 da
54 m. after 9 in the morning, making Days and Nigh
equal all the World over.

Winter Quarter begins *December* 11 day, 4 m. after
in morn. making our shortest Day, but the longest to a
who inhabit on the Southern side of the Equator.

Rule

Fly, 1726.

Rules concerning Husbandry.

If you would plant or graft, consider where the Wind is; if it be in the South, 'tis very good for that purpose; but if in the North or East, 'tis not good.

It's good to plant or graft generally the Moon encreasing in the Signs *Taurus* or *Aquarius*, in the beginning of spring, or end of Harvest.

Plant Trees for continuance when the Moon is in *Taurus*, *Leo*, or *Aquarius*.

Fell Timber, to have it sound, in *December* or *January*, in the wane of the Moon in *Aquarius* or *Pisces*.

Prune Trees, and pull off the Moss, in *February*.

Plash Hedges, and top Trees for Fuel, that the Heads may the sooner grow again, when the Moon is in *Aries* or *Libra*, and in her encrease.

Set young Quicksets from *September* to *March*.

Remove young Trees in the last Quarter of the Moon when she is in *Aries*, *Libra*, or *Scorpio*, and in the Month *September*, *November*, and *February*.

Set Vines in *February*, *March*, or *September*, especially the Moon in *Aries*, *Libra*, *Scorpio*, in her increase.

Set Rose Trees in the midst of *February*, the Moon encreasing.

Cut or Prune Trees in *March* or *April*, the Moon in *Taurus*, *Virgo*, or *Capricorn*.

Gather Fruit, as Apples, Pears, and the like, at the full Moon in the afternoon, the weather being fair and dry.

Cut down Hay presently after the full of the Moon.

Dung Ground to prevent growing of Weeds, the Moon decreasing.

Sow Carret seeds about the end of *February*, or the beginning of *March*, the Moon encreasing. Also sow Onions and Leeks in *February* or *March*, at the wane of the Moon.

Sow Cucumbers and Melons in *February*, or *March*, or *June*, in a hot fair Day.

Fly, 1726.

Sow Parsley, Fennel, and Anniseed, in *February* or *March* in the full of the moon.

Sow Marjoram, Violets, Thyme, Rosemary, and Lavender in *February, March, or April*, in the increase of the moon.

Sow Gilliflowers and Wall-flowers, in *March*, or *April* in the old of the moon.

Sow Hyssop and Savory in *March*, when the moon is in the full.

Sow double Marigolds in *February* or *March*, in the decrease of the moon.

Shear Sheep at the increase of the moon.

The best time to Geld Cattle the moon being in *Sagittarius*, or *Capricorn*.

Of Blood-letting, and some other Physick Observations.

IN Youth let Blood from the change to the first quarter; in middle-age, from the first quarter to the full; in old years from the full to the last quarter. in Old-age, from the last quarter to the change. But know, that under the Age of 14 and above the Age of 56 it is not good to bleed at all.

Again, in the Canicular, or Dog-days, 'tis very hurtful to take any Physick at all, unless there be great need. Indeed Necessity hath no Law; wherefore in such a case, the Disease being desperate, the Cure must be ventur'd.

Take a Purgation when the Moon is in Trine or Sextile Aspect with Venus, decreasing in any of the three Signs, *Cancer, Scorpio, or Pisces*, and it will be found to work the better, because when a moist Planet, in a moist Sign hath such an aspect, the humours in the Body are then stirred up and down, and so the better purged out; wherefore in this case, it cannot be amiss to prepare the humours by something that is laxative, and let this be done whilst the moon is either in *Gemini, Libra, or Aquarius*.

Take a Vomit, that it may work thoroughly, when the Moon is in *Aries, Leo, or Sagittarius*.

Fly, 1726.

is in *Aries, Taurus, or Capricorn*: and know that Aspects or the Moon with *Saturn, or Mars, or the* in *Leo*, ought to be eschewed in the taking of Me-
es. Finally, if necessity urge no haste, these Obser-
ns are expedient; for 'tis a plain truth, that the
ge of weather upon differing Aspects doth greatly
ge and alter mens Bodies.
